

# Industrial Digital Transformation Partner

**Partner with KBR for adaptable industry specific domain knowledge**  
*to achieve new levels of safety, sustainability, and profitability.*

## A PARTNER WITH DOMAIN KNOWLEDGE

**KBR delivers science, technology and engineering solutions to governments and companies worldwide. Founded in 1901, KBR offers digital transformation solutions tailored to industrial businesses.**

KBR's expertise in IoT, Cloud Computing, and Advanced Analytics has led to a new breed of intelligent technologies demonstrating enormous value for the discrete and process industries by driving a single digital strategy across the enterprise.

We combine KBR's structured approach, broad digital portfolio, and deep domain expertise with our teams' process and asset knowledge into advanced digital solutions offered by our software partners.

Our proven track record in change management and robust processes deliver successful outcomes for our clients.

## FASTEST RETURN ON INVESTMENT

KBR provides end-to-end digital partnering, including case identification, value demonstration, prioritization, implementation, and sustainment, customized for clients' needs. Our industrial domain experts leverage AI, IoT, and Cloud Computing to maximize business value through cost reduction and revenue growth.

- Cost reduction via dynamic allocation of digital experts
- Sustainment support by domain engineers, depending on the criticality
- Data analysis available as fast as possible to match project urgency
- Best-fit pricing models (T&M, consumption - based, fixed price)
- No infrastructure and administration burden via managed services
- Optimal delivery of analytics, including low code platforms

## ADAPTABLE DIGITAL CAPABILITIES

KBR's value as your digital partner combines our multidisciplinary expertise with a comprehensive approach to digital transformation. Our industrial engineers, data scientists, cybersecurity experts, and business strategists collaborate to manage the entire transformation ecosystem, from implementation and migration to security and post-installation support. We differentiate by combining the following:

### INDUSTRIAL ENGINEERS:

- Process optimization
- Equipment digitization
- Compliance support

### DATA SCIENTISTS:

- Advanced analytics
- Machine learning models
- Data visualization

### CYBERSECURITY EXPERTS:

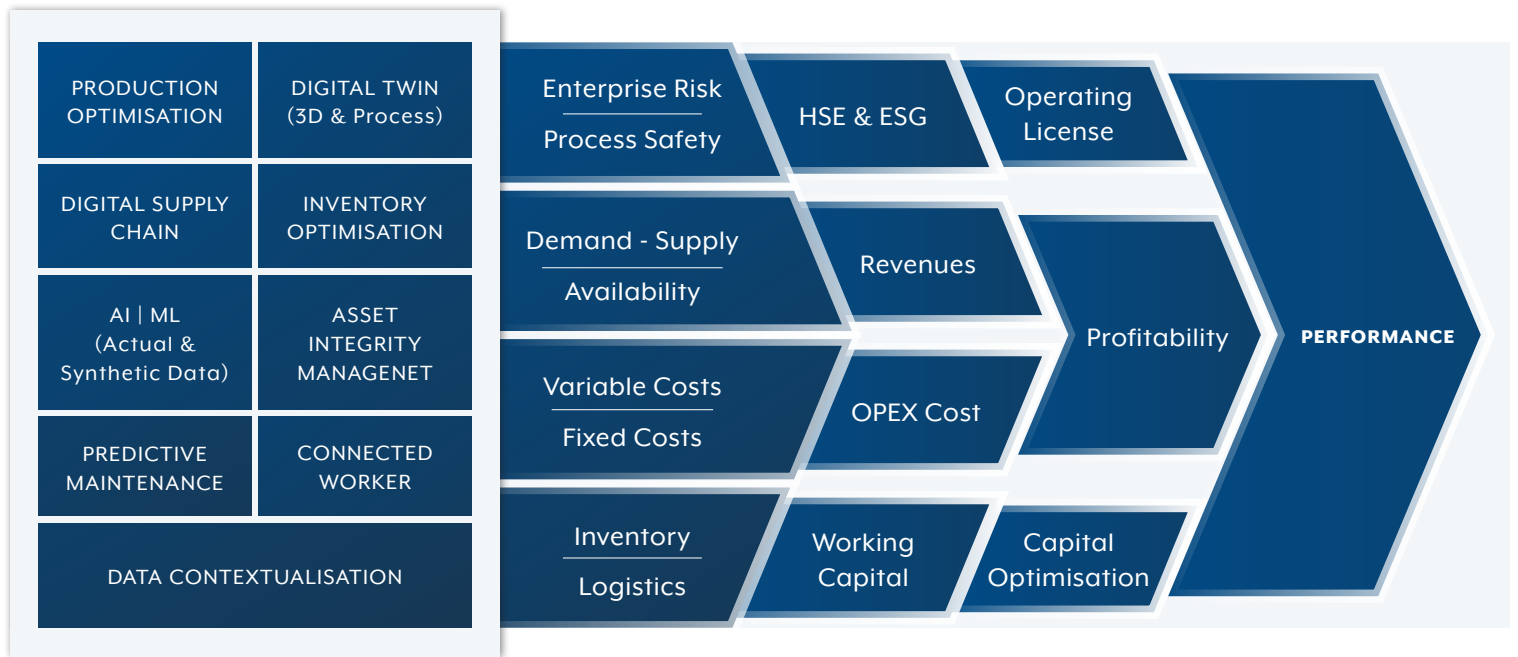

- Risk management
- Security architecture
- Incident response

### BUSINESS STRATEGISTS:

- Transformation strategy
- Change management

# BUSINESS DRIVERS & USE CASES

## AN INDEPENDENT, TRUSTED RESOURCE

KBR offers customers unparalleled technical skills and industrial domain knowledge, continuously expanding our digital presence to access local talent. Collaborating with independent software vendors (ISVs) and leaders in software, data management, and Cloud technologies, we provide our customers with the latest advancements and reliable solutions. With System Security Plans (SSPs) designed to meet ISO 27001 and NIST CSF requirements, KBR ensures robust data security. Our solution help desk, staffed by engineers, addresses diverse issues, from application functionality to performance enhancements and end-user satisfaction.

## About KBR

We deliver science, technology and engineering solutions to governments and companies around the world. KBR employs approximately 32,000 people performing diverse, complex and mission-critical roles in 34 countries.

KBR is proud to work with its customers across the globe to provide technology, value-added services, and long-term operations and maintenance services to ensure consistent delivery with predictable results.

**At KBR, We Deliver.**
